Arjun Singh

Pune, India | ajsingh5297@gmail.com | +917579733822 | LinkedIn Profile

PROFILE SUMMARY

- **4+ years** of dedicated experience in **Software Quality Assurance (SQA)** and **Software Testing**, specializing in the **Banking and Financial Services (BFSI)** domain**.**
- Involved in complete project software development life cycle (**SDLC**) and Quality Assurance Life Cycle (**QALC**).
- Worked on testing data validation scenarios and **Data ingestion, pipelines**, and transformation processes for **ETL**
- Writing test cases to meet the business requirement with proper ETL testing techniques like data completeness, transformation, Quality, incremental, initial load testing.
- Worked on **automation** for Web Application using **Selenium Web driver** (using Java) and using **Postman API.**
- Experience in various platforms like ETL Testing, API Testing, Automation testing.
- Proficient in writing the test cases and executing them using **BDD cucumber framework.**
- Good understanding of Build Automation tools **i.e. Maven** and **Data Driven Framework.**
- Experienced on Assertions and Annotation in testNG framework.
- Has a good understanding of **CI CD/Jenkins** and writing pipelines.
- Involved extensively in executing **Build Validation, Functional testing, Ad-hoc testing, Integration Testing, Regression testing, UI testing and E2E (end to end) application testing.**
- Experienced in creating **Test Plans, Test summary and defect summary reports.**
- Involved in complete project software development life cycle (**SDLC**) and Quality Assurance Life Cycle (**QALC**).
- Validated both **homogeneous** and **heterogeneous** data types..
- Regularly interacting with Clients and business analysts for updating the testing. Working closely with developers to understand the requirements.

TECHNICAL SKILLS

- **Programming**: Java, MySQL
- **Automation Tools:** Selenium WebDriver, Postman, Rest Assured, TestNG, Maven
- **Frameworks:** BDD Cucumber, Hybrid Framework, Data-Driven Framework
- **CI/CD & Version Control:** Jenkins, Git (GitHub)
- **Databases/APIs:** MySQL, Postman API, Bruno, Insomnia
- **Cloud Platform:** GCP
- **IDEs:** IntelliJ IDEA, Eclipse
- **Test Management/Tracking:** JIRA, Zephyr
- **Methodologies:** Agile, Waterfall
- **Domain:** BFSI (Banking, Financial Services & Insurance)

PROFESSIONAL EXPERIENCE

Test Engineer in **LTI Mindtree,** Pune (Oct 2021 –March 2025)
Quality Automation Engineer (SDET) in **EQUIFAX**, (April 2025 –PRESENT)

PROJECTS

Teletrack – Equifax (February 2022 - March 2024)

- Worked on the business rules validation for the various flows like **dataprep** and **ETL** flow.
- Worked on the testing of the **ETL flow** , **dataprep flow** and **atomic service** flow.
- Worked on understanding the business needs from PO's. Writing the process flow based on requirement and then automating the script.
- Worked on writing all the business rules validation under the automation script and using assertion and annotation for the validation and execution.
- Worked on automating the **E2E atomic services** flow using BDD cucumber framework.
- Worked on integrating the **plugin rules** and **business rules validation** under BDD cucumber framework.
- Worked on writing the test cases and uploading them to zephyr.
- Performed thorough re-testing and regression testing when bugs are resolved.
- Drive testable requirements and scenarios from the PO's.
- Review requirements , specifications and technical design documents to provide timely and meaningful feedback.
- Design , develop and execute test cases using test management tools.
- Consistently execute test cases (manual and /or automated) and analysis results in a timely manner.
- Worked with cross-functional teams to ensure quality throughout the software development lifecycle and follow-though and conduct post-release/post-implementation testing.
- Monitor and debug the process results.
- Effectively report bugs and errors to the development team.
- Worked on identifying the test cases for automation and script development using BDD cucumber Framework with Java & Selenium.
- Worked on understanding the PROD failures and debugging the issue.
- Worked on the test data creation for the other teams based on the business requirements.
- Worked on the dataFix activities under which analysing the report and fixing the issue.

DataX– Equifax (March 2024 - March 2025)

- **End-to-End Test Automation & Framework Development:**
    - Designed, developed, and executed comprehensive automation scripts for ETL, DataPrep, and Atomic Service flows utilizing the BDD Cucumber framework with Java.
    - Integrated complex business rules and plugin validations directly into the BDD Cucumber automation framework.
    - Automated End-to-End (E2E) testing for critical atomic services, ensuring seamless functionality across the system.
    - Identified key test cases suitable for automation, expanding automated coverage and efficiency.
- **Business Analysis & Requirements Management:**
    - Collaborated closely with Product Owners (POs) to understand and translate business needs into clear, testable requirements and process flows.
    - Drove the definition of testable requirements and scenarios, providing timely and meaningful feedback on specifications and technical design documents.
- **Quality Assurance & Validation:**
    - Led business rules validation efforts across diverse data processing flows, including DataPrep and ETL.
    - Performed thorough functional, re-testing, and regression testing cycles upon bug resolution to maintain product stability and quality.
    - Designed, developed, and executed detailed test cases using test management tools (e.g., Zephyr).
    - Consistently executed both manual and automated test cases, analyzing results to identify defects promptly.
- **Issue Triage & Debugging:**
    - Monitored process results and proactively debugged issues, including analyzing production failures to determine root causes.
    - Effectively reported and tracked bugs and errors with development teams, facilitating quick resolution.
- **Cross-Functional Collaboration & Support**:
    - Worked with cross-functional teams to embed quality throughout the Software Development Life Cycle (SDLC) and conducted post-release/post-implementation testing.
    - Provided essential test data creation support to other teams based on specific business requirements.
    - Engaged in data fix activities, including report analysis and issue resolution, to ensure data integrity.

SFP – AltFi (April 2025 -PRESENT)

- Identified key test cases suitable for automation and developed **robust scripts**, **expanding automated coverage** and **efficiency**.
- Implemented **retry logic** within automation scripts to effectively handle indecisive data flow job statuses, significantly enhancing test reliability. This allowed us to include complex scenarios, **increasing regression coverage to 90%.**
- **Streamlined** the BDD Cucumber framework by integrating complex business rules and plugin validations, **elevating functional coverage from 50% to 90%.**

- Contributed to other teams automation scripts, specifically for comprehensive database validations.
- **Designed and deployed** multiple CI/CD Jenkins pipelines, streamlining test data creation and accelerating issue debugging. This **reduced data creation dependency from 50% to 10%.**
- Integrated automated **Gmail** and **Gchat notifications** for daily regression test suite builds, ensuring timely communication of test results and build statuses.
- **Drove** data fix activities, including report analysis and issue remediation, to ensure data integrity.
- Investigated and debugged production failures, performing root cause analysis to identify and resolve critical issues.
- **Accelerated** cross-functional team efforts by providing **critical, on-demand test data creation support** aligned with diverse business requirements.

EDUCATION BACKGROUND

Bachelor of Science (B.Sc.) in Statistics from The Maharaja Sayajirao University Vadodara, India in 2021.

CERTIFICATIONS and AWARDS

Rest API Automation Rest Assured Serenity BDD
Crest award - LTIMindtree.
Strategic Thinker award -LTIMindtree
Hi -Five Award - LTIMindtree
Super Crew award - LTIMindtree
Accountability awards - LTIMindtree
